THE MINI POOL – COMPACT AND CREATIVE

WATERFRONT LIVING. AT HOME.

The first compact garden pool, which effortlessly turns your outdoor living space into your own private water terrace *qualiving*™ is the keyword here. If you have always dreamt of a lake side property, with C-SIDE, the creative concept from RivieraPool, you can easily achieve this.

Not a Swimming Pool, Not a hot tub. But a pool, ...

... which brings the appeal of shallow water into your garden. For some, it is a water feature; a lounge area by the water. For the others, an Aqua lounge; the chill-out zone to immerse yourself in – for cooling or warming – to float and relax – for the enjoyment of water.

WHAT TYPE OF GARDEN DO YOU PREFER?

WWW.CSIDEPOOLS.DE

THE DESIGNER

will install the pool in his stylish Bauhaus terrace. Dark „granite“ surfaces, natural stone look or trendy mosaics from Ezarri or Sicis reflect the light. The „SlimLine“ components are installed flush and bring the air-water mixture to the bathers. The design is linear and architecturally clean. The “Ambi-Light” casts elegant waves on the vertical surfaces of the surrounding enclosures.

Fotos: kupkagarten.de

THE NATURALISTS

will design the C-SIDE quite organically. Many plants around the water, warm colours and rustic touches with lots of wood and a fire pit to keep warm in the evening. Heating can be achieved with an air source heat pump. After finishing with the garden treat yourself to a fresh foot bath or a warm whirlpool – you deserve it.

THE CONNOISSEUR

"My private C-SIDE" The perfect combination of water, fire and outdoor cooking. With the water at the centre of the lounge area and surrounded by fragrances from the garden, relax and revitalise your body and mind before completing the menu with freshly cooked food and fine wine. Add to the ambiance with a fire pit extending your peaceful evening.

Fotos: kupkagarten.de

THE ACTIVE GARDENER

C-Side becomes a fitness area in the garden. Thanks to an air source heat pump, it can be heated quickly and offers a small wellness oasis. Just perfect after a vigorous cycle or jogging session. It is enjoyed also by the early bird, good because the warm water, filled with oxygen, massages tired muscles and revitalises.

Create your own atmosphere in your wellness oasis

TECHNIQUE SHAFT
Everything in a single package: from filter pump to electric heater

DELIVERED READY FOR CONNECTION
Your C-SIDE pool is delivered completely equipped

NO CRANE NEEDED
Can also be moved without a crane by more than 4 people

COLOURS & SURFACES

GRANICITE STONE GREY

The pool colour granicite stone grey offers a real, natural stone look. In conjunction with a natural stone paving around the pool, it harmoniously brings together the pool and paved surround. Stainless steel accessories provide contrasting textures. A pool in granicite stone grey reflects in the bright sun, offering refreshing strong blue water.

TEMPERATURE UP TO 30°C

TEMPERATURE UP TO 30°C

PAPYRUS

A pool surface in papyrus recedes into the background and is easy to clean. The water is a bold blue colour. Stainless steel components against this surface are very unobtrusive, yet give a high-end finish. Create a border in various shades of grey or even sandstone. Papyrus is fully recommended for outdoor use.

GLASS MOSAIC

Today mosaic is one of the most demanding and most durable surfaces in swimming pool construction. The individual glass pieces each have a different tone and lend a fully unique reflection of light and colour to your pool, depending on the angle you're looking from. This results in an infinite number of different colour effects which you can then use to create the ambience in your outdoor pool area.

TEMPERATURE UP TO 40°C

DIAMOND

INOX

EBANO

CAPRICORN (MATT)

OCEAN

JADE

ASH (NATURSTEINLOOK)

THIS IS A SELECTION OF AVAILABLE MOSAICS. ALL MOSAICS CAN BE FOUND ONLINE OR AT YOUR NEAREST SHOWROOM.

AMBIENCE

LED-LIGHTING

A pleasant summer evening at your pool, feet in the water, the water movement is reflected and creates a distinctive mood for your garden. You have two ambient lighting designs available. The „White-Light“ for a bright white and the „Ambi-Light“ which can conjure up countless colours in your pool. The RGB colour light can be changed via remote control.

SOURCE INLET NOZZLES

Water reflections can only be achieved in moving water. For this reason we have used a new nozzle alignment in the C-SIDE pools. These source nozzles do not radiate in the pool, but against the water's surface, so that the colour of light can break and fill your garden with beautiful light reflections. These are extremely quiet and replace what are usually "disturbing" flowing streams and fountains.

FUNCTION

WATER FOUNTAIN

Designed to move the water and bring an elegant, refreshing massage function to your pool, a water fountain made out of stainless steel is worth considering. This is not only beneficial for the neck and shoulder area, but is sleek and interesting in its design.

CUBE WATER CURTAIN

This water curtain impresses through its absolutely straight linear design. It is ideal for installation on the coping stone as a water curtain or can also be integrated as a stylish design accessory in an individual wall with facing stones. This allows you to create an attractive stream in your pool. The water curtain is extremely resistant to weather conditions, thanks to the superior material used (V4A).

MASSAGE FUNCTION

WATER, HEAT, MASSAGE SYSTEMS

The buoyancy of the water has the effect of making our body only a tenth of its actual weight. The body floats, joints are relieved, the circulation is stimulated. Heat really gets your blood flow going. This is important because our blood's job is to transport vital oxygen, nutrients and medicinal substances to our body cells.

Massage jets are directed specifically to target muscles helping relax and repair the strains of daily life. The air bubble system enables your skin to vibrate, meaning skin circulation is doubled in a very short space of time. Oxygen passes through pores into your skin, this considerably improves the oxygen supply to your body.

NOZZLE TYPES

MICROJETS

FOR SHIATSU (FINGER PRESSURE) MASSAGE

These jets have the diameter of a finger and thus bring about a strong, localised finger pressure massage. They are directed to the muscles in the shoulder and neck area. The microjet massage jets work sporadically and with emphasis on the shoulder girdle. If you slide a little deeper into the water, the flood massage also includes the muscles of the neck and back of the head, tendons which are effectively eased, taking away tension and pain.

TURBOJET NOZZLES

FOR A HARD AND DEEP MASSAGE

Turbojets are large, powerful nozzles which are directed to the large and powerful muscles of the lower back and provide a deeper massage. The two turbojets are placed in the lumbar region and provide a strong kneading massage to the trunk muscles the sciatic nerve and the hip joint. This strong and direct massage can knead the hardened muscles, can gently loosen arthrosis adhesions in the connective tissue and joints and loosen deposits.

COVERS

INSULATING COVER

Light four-part insulating cover that protects the water against overnight cooling.

ROLLER COVER WITH CRANK

Practical cover for your C-SIDE pool fixed to the edge with hooks.

WIND & WEATHER COVER

A stylish alternative to a roller cover, this cover provides effective insulation in all wind and weather situations.

DAY BED

Enlarge your wellness oasis! In addition to its straight linear design and isolating function, the day bed also provides a comfortable reclining surface.

DESIGN QUALITY AND ADVANTAGES

EASY TO CLEAN

The skin-friendly surface of your C-SIDE pool is always easy to take care of. Dirt, algae or limescale have no opportunity to affect the non-porous smooth material. Cleaned with a soft cloth from time to time, it ensures years of pleasure. Smooth walls significantly reduce the effort of cleaning agents.

ROBUST AND LONG-LASTING

The inside of a C-SIDE pool consists of seven layers. Each layer performs a specific function and, when combined, they are responsible for the unique characteristics of your C-SIDE pool. Starting from the water-side of the pool, the first two layers provide a fade-resistant, easy-care surface that is friendly to your skin. The first, high-density coloured layer is UV-resistant and also resists many chemicals and cosmetics. Their long-term resistance to fading is the result of years of work and strict processing guidelines.

The second layer makes the pool walls noticeably smoother, which helps keep dirt, algae, and lime scale from adhering, making the surface easy to clean and kind to the skin. Scratches or damage can easily be buffed out as required. The glossy, smooth surface ensures that the pool continues to look good and fresh even after many years.

QUICKLY ASSEMBLED

After delivery by your installation personnel, the pool is set on a compacted and smooth gravel layer and backfilled with polystyrene concrete or sand. The pumps have already been installed in the technology duct. The duct is connected by pipes to the pool and must always be installed below the water level. In a few days your C-SIDE pool is ready for use.

Material structure

POOL *in* STALLATION...

...IS ALSO EASY.

SURROUND IS 45 CM IN HEIGHT

GROUND LEVEL INSTALLATION

WHY C-SIDE ?

- FLOOR-FLUSH INSTALLATION POSSIBLE
- SEMI-RECESSED INSTALLATION POSSIBLE
- ROOF TERRACE VERSION POSSIBLE
- CAN BE ERECTED ON GRAVEL
- NO BASE PLATE REQUIRED
- NO DUCT CONNECTION NECESSARY
- NO FRESH WATER PIPE NECESSARY
- ALL FITTINGS PRE-INSTALLED
- ONE-PIECE PREFABRICATED POOL
- DURABLE EPOXY ACRYLATE

TECHNOLOGY

To ensure you have more pleasure than work with the pool, your C-SIDE pool, the right technology comes preinstalled. Only the pool with the technical duct

needs to be connected on site. Depending on the installation you can be enjoying the pool two days after delivery.

WATER TREATMENT

Crystal-clear water is easy to achieve. The pre-installed skim-filter clears the water in two stages. Leaves and coarse dirt get stuck in the filter basket. Suspended solids and fine particles are filtered by the filter cartridge. The multibloc in the prefilter easily ensures disinfection of the water.

C-SIDE IS AS DIVERSE AS YOU ARE!

Combine C-SIDE with your personal outdoor lifestyle. For this we have prepared a number of plans. Each one is a little recipe to feel good. Never has a garden idea been turned into a wellness concept so simply and quickly. Think of all the things you would like to take with you on your new wellness and relaxation trip: A terrace with canopy or a gazebo, a pool house? What does your Aqua-lounge look like? With whom do you want to spend time there? How big and "relaxing" is your "chill lounge"? Where are the drinks chilled and where is the barbecue? Take the opportunity and explore your creativity. The ultimate design for your enjoyment!
